COLOURING FUN!

COW FACTS

- Did you know that cows can detect smells and odours from up to six miles away? You do now!
- Cows are very social animals which is why you'll almost always find them in a herd.
- Something *udderly* cool about cows is that they don't have any upper teeth.
- Cows spend about 10 hours a day lying down but cows actually only sleep for four hours a day.
- Cows can actually see in colour but Bulls are red/green colour-blind.
- It may shock you to know that cows can swim.
- It's often said that cows can predict the weather and that if they are sitting down it means it's going to rain. But cows sit down a lot - and for a variety of reasons!
